📞 +923055508284 | ✉️ muhammaddanialkhan298@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | 📍 Rawalpindi, Pakistan

Computer Science graduate with a strong foundation in Cyber Security, Networking, and Linux Administration. Experienced with vulnerability assessment, security monitoring concepts, and basic penetration testing through hands-on labs and practical learning platforms. Eager to contribute to Security Operations Center (SOC) activities, threat detection, Incident analysis, improving system security and continuously learning defensive and offensive security techniques.

EDUCATION

PMAS Arid Agriculture University Rawalpindi

Rawalpindi, Pakistan

BS in Computer Science

Oct. 2022 – May 2026

- Coursework: Data Structures & Algorithms, Operating Systems, Databases, Cyber Security, Networking
- Final Year Project: **Electricity Theft Detection System** – data-driven system identifying abnormal consumption patterns to detect power theft and improve energy monitoring

PROJECTS

SOC Simulator | Log Analysis, Alert Monitoring, Incident Response Basics

- Developed a SOC simulation environment to analyze and monitor system logs for detecting potential security threats and suspicious activities.
- Implemented log analysis techniques to identify abnormal patterns and generate basic security alerts for incident detection.
- Simulated real-world SOC workflows including event monitoring, threat identification, and initial incident response concepts.

Network Packet Sniffer | Python, Scapy, Socket Programming, Linux, Network Security

- Developed a Python-based network packet sniffer to capture and analyze live network traffic in real time.
- Implemented packet inspection for protocols such as TCP, UDP, ICMP, and ARP, displaying source/destination IP addresses and packet details.
- Built a command-line interface allowing users to select network interfaces and control packet capture while demonstrating practical network monitoring and cybersecurity concepts.

Network Security Scanner | Python, Network Analysis, Security Tools

- Developed a network security scanning tool to identify open ports, active hosts, and potential vulnerabilities in target systems.
- Implemented automated network reconnaissance techniques to gather system information and detect security weaknesses.

TECHNICAL SKILLS

Operating Systems: Linux (Ubuntu, Kali Linux), Windows

Networking: TCP/IP, DNS, HTTP/HTTPS, Network Fundamentals

Security Skills: Vulnerability Assessment, Web Application Security, Basic Penetration Testing, Linux System Security

Security Tools: Nmap, Wireshark, Burp Suite, OWASP ZAP, Splunk, John the Ripper

Platforms & Labs: TryHackMe, OWASP Top 10

Core Concepts: Information Security, Risk Assessment, Security Monitoring, Incident Response Fundamentals

Development & Utilities: Git, GitHub, Linux CLI, VS Code, Postman, Zapier

ADDITIONAL INFORMATION

Languages: English (Intermediate), Urdu (Native)

Availability: Open to internship and entry-level Cyber Security, SOC Analyst,

Interests: Cyber Security, Ethical Hacking, Network Security

Soft Skills: Problem-solving, Analytical Thinking, Teamwork, Self-motivated,
