

MUHAMMAD DANIAL KHAN

Junior Backend Developer | Cybersecurity Intern

Iran road., Rawalpindi • 92305-5508284 • muhammaddanialkhan298@gmail.com

SUMMARY

I am a motivated beginner-level Backend Developer with a strong interest in Cybersecurity. I have hands-on experience working with backend concepts such as Node.js, Express.js, basic MongoDB, and REST APIs. Alongside backend development, I have foundational knowledge of cybersecurity, including network scanning, basic reconnaissance, Linux usage, and security fundamentals.

I am passionate about learning how secure systems are built and how vulnerabilities can be identified and prevented. I actively practice through labs, small projects, and self-learning platforms to improve my skills. I am eager to grow as a backend developer while strengthening my cybersecurity knowledge and aim to build secure, scalable applications in the future.

WORK EXPERIENCE

Cybersecurity Intern
Tech Toch Solutions

August, 2025 – Dec-2025

- Worked as a Cybersecurity Intern focusing on fundamental security concepts and practical exposure.
 - Performed basic network reconnaissance and scanning using tools like Nmap.
 - Gained hands-on experience with Linux (Kali Linux) environment and common security utilities.
 - Assisted in identifying basic security vulnerabilities and understanding common attack vectors.
 - Learned about web application security fundamentals, including authentication issues and basic misconfigurations.
 - Practiced ethical hacking concepts in lab-based environments for learning purposes.
 - Developed a strong interest in defensive security and secure system design.
-

EDUCATION

Bachelor of Computer Science

- Graduated: June, 2026 (in Progress)

Intermediate in Computer Science

- Completed: July, 2022

PROJECTS

- Worked as a Backend Developer on the Final Year Project “AI + IoT Based Smart Electricity Theft Detection and Monitoring”, responsible for backend logic and API development.
 - Handled data received from IoT devices and managed backend processing and storage.
 - Developed REST APIs to support communication between hardware devices, AI components, and the monitoring dashboard.
 - Implemented basic security measures to protect backend services and data transmission.
 - Also worked on a Crypto Wallet Project, developing backend functionality related to user authentication and transaction handling.
 - Integrated security-focused features such as input validation and authentication to enhance data protection.
 - Gained hands-on experience in secure backend development and understanding security challenges in real-world applications.
-

SKILLS

Backend Development

- Node.js (Beginner)
- Express.js
- RESTful APIs
- Basic MongoDB
- Backend Logic & Data Handling

Cybersecurity

- Cybersecurity Fundamentals
- Basic Network Reconnaissance
- Nmap (Basic Scanning)
- Web Application Security Basics
- Authentication & Input Validation
- Linux / Kali Linux (Basic)

Tools & Technologies

- Git & GitHub (Basic)
- Postman (API Testing)
- Basic CLI Usage

Soft Skills

- Problem Solving
- Continuous Learning Mindset
- Interest in Secure System Design
- Team Collaboration
